

START

**X** marks the spot!

Design a treasure map and write instructions for a family member to follow and find the hidden treasure for your own unique treasure island. The island can have a theme if you wish. Get creative!

There must be at least 10 steps to make sure the enemy will not discover the treasure first. One square = one space.  
You must ask your family member to change direction using only compass bearings (degrees) and clockwise/anti-clockwise.

Make sure you begin by telling them which direction to face and guide them one step at a time to the treasure square.

For example:

- 1) Face East
- 2) Move forward 5 spaces
- 3) Turn 45° clockwise
- 4) Move forward 1 space
- 5) Turn 90° clockwise
- 6) Move forward 3 spaces and so on.....

Write your instructions down or type them (it is important to keep secret instructions separate in case your map falls into the wrong hands!)
