

## 6G Home Learning – 3<sup>rd</sup> July

- The fastest recorded tennis serves are over 155 miles per hour.
- Sports have been played on the moon.
- Golf balls were originally made from dried cow eyeballs. 🤢

Today's first task begins with a piece of artwork. Have a look at the examples below.

- Step 1: Draw around your hand and arm.  
Step 2: Decorate your hand and create a border around your page.  
Step 3: Colour your work.  
Step 4: In the spaces around your hand and between your fingers, write some information about yourself including things that you value and find important. Take time with this task and either email a photo or send your work into school. We will display these in September.

### TASK 2

Complete the attached 6G questionnaire and send it back to me. Add any additional information you would like me to know and any questions you may have for me.

## **Task 3 - Writing Task**

I would like you to write me a letter explaining to me why you will make an excellent member of 6G. Think about all your good qualities (I am sure you have many).

- Think about your persuasive language and techniques.
- Think about the layout of a letter.
- Remember you are trying to convince me that you will be an excellent member of our class. Tell me what qualities you will bring.

Email your work or a picture of it to
