Maths: adding fractions with different denominators

<https://www.loom.com/share/891c4bd918ad4c0d9f092fea1b8df9c1>

Re-watch yesterday's video about adding fractions and finding the common denominator.

Do the questions on the maths sheet I've uploaded. I'll upload the answers a little later.

Science: David Attenborough

<https://www.loom.com/share/7cb7303f0896429c9f709b2559c0fd4d>

Yesterday you learnt about Jane Goodall and the research she did with chimpanzees in Tanzania.

Jane is a **naturalist**. A **naturalist** is a person who studies and knows a lot about plants and animals. For instance, Steve Backshall is a naturalist, as well as an adventurer.

But probably the most famous naturalist of our time is David Attenborough. He is 94 and still cares passionately about our planet and the plants and animals on it.

Task:

- 1) Read the PowerPoint that I've uploaded about David Attenborough (this is not on the website).
- 2) Click on the link below and read the webpage. (And watch the videos, if you want.)

<https://www.bbc.co.uk/teach/nine-astonishing-ways-david-attenborough-shaped-your-world/z4k2kmn>

- 3) I want you to create a **ten question** quiz about David Attenborough.
- 4) Then test your family and see how they get on. Did they get 10 out of 10? Let me know how they and you did.
